

Looking for computer engineer/Coder who is familiar with Wordpress based websites. Existing site also has a significant amount of custom code built-in.

Tasks specific jobs to begin.

1. Change servers.
2. Change websites credit card processing system.
3. Fix security glitches that are driving me crazy.

There is consistent work now that could turn into a more full time position down the road.

Bonus points for any Wordpress Guru who also knows how to build mobile apps!

Looking forward to talking with some of the amazing talent we have in and around the Start Garden family. Please send resume's to [Asavescott@gmail.com](mailto:Asavescott@gmail.com)

I recommend checking out the website to see what we're all about.
